

Glossy Concrete Floor Densifier Chemical

HTG-EC-N01 Concrete sodium densifier

Porous concrete tends to absorb stains and resist extensive polishing when not properly treated. Most sealers with only cover the surface without penetrating deep into pores to protect the concrete. This Sodium based densifier is the perfect way to harden deeper layers.

Features and Advantages:

- 1.Hardens concrete increasing service life.
- 2.Surface become chemicals resistant and repels stains.
- 3.Remains within the pores of the concrete rather than only on the surface like most sealers,so the entire floor remains glossy(after polishing)rather than just areas not affected by traffic.
- 4.Works well with the diamond polishing system because it is hard enough to withstand constant polishing.
- 5.Densifiers and dustproofs bare concrete and terrazzo (cement based)floors.
- 6.Reacts instantly upon contact with floor surface.
- 7.Produces surface gloss which improves with age.
- 8.Wil noet absorb water or contrbutite to floor sweating.
- 9.High traction,non-slip for safe floors.
- 10.Apply to the Wear-resistant, dust-free, increase strength, impermeability, durability, easy to cleaning concrete floors.

product name	HTG-EC-N01
based	Sodium Based
ratio of Sodium and water	1:1
Using of per squire meter	0.2KG
Day time	Surface dry≤6h;Hard dry≤24h
